

Developing Canada's Helium Resources

Corporate Presentation

April 27, 2022

TSXV: HEVI

Reader Notice

Forward-looking Statements

Certain statements contained in this corporate presentation may constitute forward-looking information and statements. All statements in this corporate presentation, other than statements of historical fact that address events or developments concerning Helium Evolution Incorporated (hereinafter referred to as the "Company" and "HEVI") that the Company expects to occur are "forward-looking information and statements". Forward-looking information and statements are often, but not always, identified by the use of words such as "anticipate", "plan", "estimate", "execute", "expect", "future", "will", "project", "propose", "potential", "target", "trajectory", "begin", "complete", and similar expressions and variations (including negative variations). The forward-looking statements and information are based on certain key expectations and assumptions made by the Company,

In particular, but without limiting the foregoing, this corporate presentation may contain forward looking information and statements pertaining to the following: the use of proceeds from the offering, the Company's current targets (the "Targets"), the Company's business prospects or opportunities, including information concerning potential technologies, products, services and strategies the Company is pursuing; market trends and size of market projections with respect to commodity supply and demand; obtaining all of the required governmental, regulatory, and board approvals and any other additional approvals in connection with the Targets and the proposed business and financing strategy; the performance of the Company's business and operations; the intention to grow the business and operations of the Company; commencement and timing of initial commercial production; future liquidity and financial capacity; expectations regarding the Company's ability to raise capital; and projected costs associated with the planned business activities.

The forward-looking statements and information are based on certain key expectations and assumptions concerning the Company's ability to (i) complete its capital raising activities by way of one or more private placement offerings, and (ii) to execute on its capital and drilling programs. Although the Company believes that the expectations and assumptions on which such forward-looking statements and information are based to be reasonable, readers are cautioned not to place undue reliance on forward-looking statements, as there can be no assurance that the plans, intentions or expectations upon which they are based will occur. Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties.

Actual results could differ materially from those currently anticipated due to a number of factors and risks. Such factors may include the Company not being able to complete its capital raising activities, the Company not being able to obtain required regulatory and/or governmental approvals for any desired operational activities, changes in regulatory policy and compliance requirements, changes in industry conditions in and around target market areas, market and consumer demand for helium, labour and/or equipment shortages, delays or changes in plans with respect to planned capital expenditures, fluctuations in input prices, fluctuations in relationships with potential partners, ability to secure relationships with certain targeted parties, changes in strategy and offerings of competitors, number of competitors in the Company's target markets, fluctuations in business development and supply chain, fluctuations in foreign currency exchange rates, fluctuations in interest rates, reliance on industry and/or retail partners and other factors that may be beyond the Company's control, including any impact, directly or indirectly, as a result of the COVID-19 pandemic on a local and global scale. Should one or more of the above noted risks or uncertainties materialize, or should any underlying assumptions provide incorrect or materially differ, actual results, performance or achievements of the Company or industry results, may vary materially from those described in this corporate presentation. Readers are cautioned that the foregoing list of factors is not exhaustive. All of the forward-looking information and statements contained in this corporate presentation are qualified by these cautionary statements. The reader of this corporate presentation or to place undue reliance on any forward-looking information and statements. The Company expressly disclaims any intention or obligation or regulatory authority in Canada, or any other jurisdiction.

The discounted and undiscounted net present value (NPV) of future net revenues attributable to helium reserves do not represent fair market value; and the estimates of helium reserves and future net revenue for individual properties may not reflect the same confidence level as estimates of helium reserves and future net revenue for all properties, due to the effects of aggregation. Therefore, the Company's actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking estimates and if such actual results, performance or achievements transpire or occur, or if any of them do so, there can be no certainty as to what benefits the Company will derive therefrom.

Non-Solicitation

This is not an offer to sell or a solicitation of an offer to purchase securities by the Company. By agreeing to receive this corporate presentation, you agree to be bound by the provisions of this disclaimer. Any subsequent offer to sell or solicitation of an offer to purchase securities by the Company will be made by means of offering documents (e.g., term sheet, prospectus, offering memorandum, subscription agreement and or similar documents (collectively, the "Offering Documents")) prepared by the Company for use in connection with such subsequent offer or solicitation and only in jurisdictions where permitted by law. In the event of a subsequent offer to sell or solicitation of an offer to purchase securities by the Company, investors should refer to the Offering Documents for more complete information. The attached material is provided for informational purposes only as of the date hereof, is not complete, and may not contain certain material information about the Company, including important disclosures and risk factors associated with an investment in the Company. This information does not take into account the particular investment objectives or financial circumstances of any specific person who may receive it. In the event of a subsequent offer to purchase securities by the Company, more complete disclosures and the terms and conditions relating to a particular investment will be contained in the Offering Documents prepared for such offer or solicitation. Before making any investment, prospective investors should thoroughly and carefully review the Offering Documents with their financial, legal and tax advisors to determine whether an investment is suitable for them.

Neither the Company nor any of its directors, officers, employees, agents, consultants or advisors makes any representation or warranty in respect of the contents of this corporate presentation or otherwise in relation to the Company or its business. In particular, no representation or warranty, express or implied, is made as to the fairness, accuracy or completeness of the information or opinions contained herein, which have not been independently verified. No person shall have any right of action (except in case of fraud) against the Company or any other person in relation to the accuracy or completeness of the information contained in this corporate presentation. The information contained in this corporate presentation is provided as at the date hereof and is subject to amendment, revision and updating in any way without notice or liability to any party.

Opportunity Highlights

World Class Land Position

- HEVI is the largest publicly traded helium land rights holder with 5.48 million acres of permitted land
- HEVI currently holds an application for an additional ~200,000 of helium land permits
- Management has identified over 180 potential helium anomalies on HEVI land

Portfolio Prospects

- · Identified at least six drilling targets through detailed seismic analysis
- Over 750km of 2D seismic data purchased and shot to date
- Drilling program scheduled to begin in Q2 - Q3 2022
- · Helium production and sales targeted to commence in O1 2023

Proximity to Success

- . HEVI's land base surrounds what appears to be a successful discovery by peer, North American Helium
- North American Helium has drilled five production wells and licensed a sixth on a helium structure adjacent to HEVI's initial drilling targets

Government Support

- The Saskatchewan government has shown significant support for helium production in the province
- The government's public vision is to secure 10% of the global helium market share by 2030 through its Helium Action Plan
- Attractive royalty structure

HEVI'S GREEN COMMITMENT

With helium reserves situated alongside environmentally-harmless gases such as nitrogen, Saskatchewan is positioned to become the world's most green source of helium to supply future global demand

HEVI is committed to finding and developing economic and green helium resources by leveraging its sizable position in southern Saskatchewan's helium fairway

An Experienced Team

Extensive resource development expertise with a history of success in Saskatchewan

Greg Robb

President, Chief Executive Officer, and Director

Over 35 years of experience across all facets of Western Canadian energy resource activity including exploration and development, acquisitions & dispositions, and reserve valuations. Previously held executive positions in several E&P companies and founded *Salvo Energy Corp*. in 2006. Extensive experience in heavy oil, shallow gas, coal bed methane, deep basin tight gas, and conventional oil and gas plays, evaluating over \$500MM of acquired assets.

Ryan Tomlinson

Chief Financial Officer

Mr. Tomlinson holds the Chartered Professional Accountant (CPA) and Certified Management Accountant (CMA) designations. Mr. Tomlinson has extensive financial accounting experience with domestic and international private and public oil and gas companies and has raised equity in both private and public markets. He has held key roles with increasing responsibility serving as Controller and CFO.

James P. Baker

Chairman & Independent Director

Mr. Baker has over 40 years of resource development experience in Saskatchewan and Alberta in field operations, consulting, and executive level positions. Extensive experience consulting to industry and government in oil and gas, power, and paper recycling. Currently a board member of *Keystone Royalty Corp.* and *Kineticor Resource Corp.*. Former Director of *SaskEnergy, Hanson Engineering*, and *Heritage Gas.*

Michael Graham

Independent Director

An independent businessman with over 35 years of energy and resource development experience. Previously served as Executive Vice President of *EnCana Corporation* and as President of the Canadian division of the company. Currently serves on the board of *Halo Exploration Ltd.* and *Saguaro Resources Ltd.*

Jeff Barber

Director

Mr. Barber was a Co-founder and managing partner of a boutique M&A advisory firm in Calgary. Prior thereto, he was an investment banker with national investment firms and began his career as an economist with *Deloitte LLP*. Mr. Barber has served on the board of *Standard Lithium Inc.* since 2017 and has been an independent businessman since September 2018. Prior thereto he had been a founder, director, and Chief Financial Officer of *Hiku Brands Company Ltd.* since 2016.

Patrick Mills

Chief Operating Officer

Over 35 years of executive, managerial, and engineering & operational experience in the Western Canadian Sedimentary Basin. Previously founded *Mustang Resources* and *Pegasus Oil & Gas* where Mr. Mills held executive and board positions; also held technical and managerial positions with *Texaco, Imperial Oil Ltd.* and *Startech Energy*.

John Kanderka

VP, Land & Corporate Development

Over 40 years in the energy and mineral sectors as both an officer and director of private and public entities. Previously founded multiple companies leading to a wide array of experience in corporate finance, mergers and acquisitions, buyouts, and corporate restructuring. Currently a Director of *Orestone Mining Corp.* and Chairman & Founder of *Visionary Gold Corp.*

Brad Wall

Independent Director

Spent 18 years in politics highlighted by a role as **Premier of Saskatchewan**, leading the province through record population and economic growth, export expansion, infrastructure investment, and securing a AAA credit rating. Currently a Special Advisor to the **Osler** Calgary office and a Director of **Whitecap Resources**, **NexGen Energy** and member of the **Canada American Business Council** and **The Fraser Institute**.

Philip Hughes

Independent Director

Over 35 years of Canadian energy experience serving as President and CEO of five energy companies across Canada. Previously a senior executive with *Fortis Inc.* including CEO of *FortisAlberta*, *Newfoundland Power Inc.*, *Maritime Electric Company*, and *FortisBC*. Currently Chairman of *Oceanic Wind Energy Group* and *Kineticar Resources Inc.*

Heather Isidoro

Independent Director

Ms. Isidoro has over 20 years of experience in the energy industry, the last 17 of which focused on business development, most recently as VP, Business Development with *Pine Cliff Energy Ltd*. She brings a broad range of industry experience with specialization in acquisitions and divestitures, reserves valuations, and financial modeling. Ms. Isidoro is President and a Director of the *Petroleum Acquisitions and Divestitures Association*, and a Trustee on the *University of Saskatchewan Engineering Advancement Trust*.

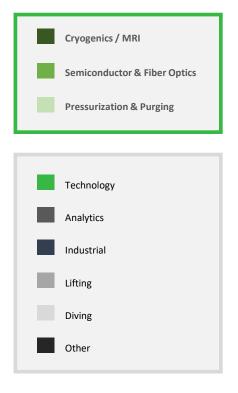

A Growing Need for Helium

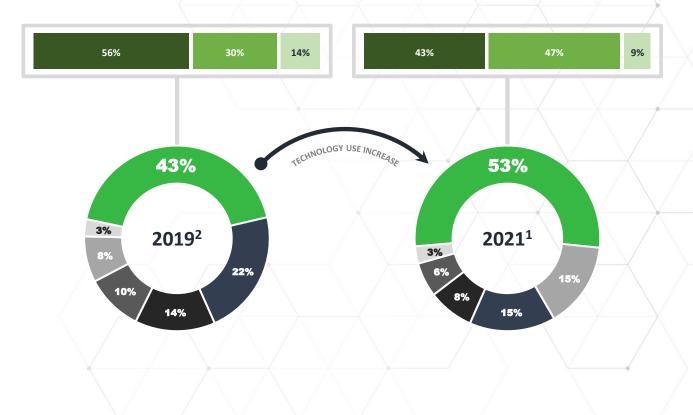

HELIUM EVOLUTION

- Technology industry demand for helium has been increasing^{1,2}
- The helium market is expected to grow 11.2% (CAGR) over $2021 2026^3$
- Annual helium demand reached 6.5Bcf in 2021⁴
- Several countries, including Canada, have now classified helium as a critical mineral⁵

KEY DRIVERS1

- ✓ Medicine
- ✓ Aerospace
- ✓ Computing
- ✓ Green technology

Global Helium Market Update; Edison Investment Research; 2021
Helium Macro View Update; Edison Investment Research; 2019

³ Global Helium Market Report; Research and Markets; 2021
⁴ Helium Market – Growth, Trends, COVID-19 Impact, and Forecasts; Mordor Intelligence
⁶ Critical Minerals; Government of Canada; 2021

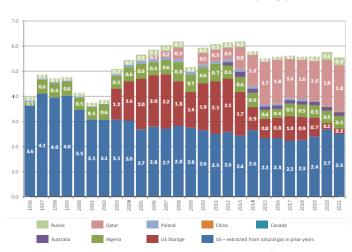

The New Market Landscape

- Below market pricing by the U.S. Strategic Reserve imposed price suppression for decades that has now been removed
- · North American supply has significantly weakened with the elimination of the U.S. strategic reserve
- · As the helium market continues to evolve, greater transparency into market pricing for helium is expected
- Wholesale helium pricing in the US\$600 mcf range and retail prices in the US\$2000 per mcf range as reported by an industry competitor¹

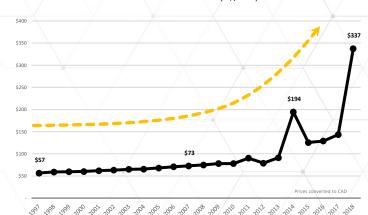

Supply Estimates

RESULT

Pure-play Canadian helium development is now economically viable and deemed critically important for Canada's economic development.³

¹ https://www.bloomberg.com/press-releases/2022-04-13/avanti-energy-confirms-major-helium-discovergive for the second of Land Management; 2023.

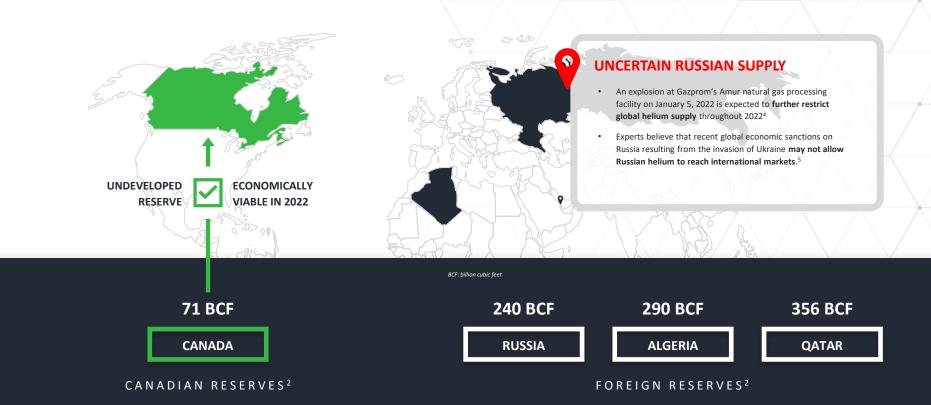

² USGS; US Bureau of Land Management; 2023.

³ Childed Management; 2023.

The North American Opportunity

- North America has historically represented the largest source of helium demand, with the U.S. alone accounting for 30% of global consumption¹
- Canada's largely undeveloped helium reserves present an opportunity for Canada to support North American demand
- Foreign producers present significant geopolitical risk to domestic North American helium buyers³
- Canada is an ideal global supplier with a track record of transparent, regulated and environmentally-responsible resource development

A Global Need for Green Helium

- Currently, over 95% of helium is produced as a **by-product of natural gas / NGL production**. By specifically targeting helium, HEVI anticipates **greener production**.
- Global emission standards are expected to significantly increase the need for non-natural gas helium projects in order to satisfy growing global demand for sustainable helium.¹
- Saskatchewan's helium is the greenest supply available.

⁴ Amarillo Helium Plant; Preservation Texas;

Our Saskatchewan Advantage

HEVI has selected Saskatchewan to pursue its helium resource development strategy given the province's regulatory, infrastructure, and geological benefits, coupled with close proximity to the U.S. market

Ideal

Geological Structure

Optimal

Regulatory Regime¹

Established

Infrastructure

- ✓ Proximal to significant basin of uranium and thorium source rocks
- ✓ Known economic concentrations of helium²
- ✓ Dominant presence of **nitrogen carrier**gas²
- ✓ Home to Canada's largest helium producer, North American Helium

- ✓ Helium regulations separated from natural gas regulations
- ✓ **Non-competitive** bidding process with Crown
- ✓ 21 year lease terms
- ✓ Drilling not required to maintain permits
- √ 4.25% net provincial royalty rate

- ✓ Easy access to public roads, power, and water
- ✓ Existing pool of skilled resource labour
- ✓ Identical drilling process and equipment as natural gas
- ✓ 1 hr drive from HEVI permitted lands to US border (30% of global consumption)

The Saskatchewan Government's vision is to secure 10% of the global market share for helium by 2030 through its Helium Action Plan

¹ Emerging Ideas, Industrial Technology: Helium; Cormark Securities; 2020

Target Formation

HEVI's Target Geological Formation: The Deadwood

Regional Data Used

Significant sources of well logs, seismic, and aeromagnetic data on the Deadwood are available and were used to select the best drill targets.

Simple Drilling Process

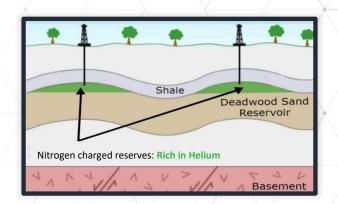

Helium drilling is similar to conventional natural gas drilling which requires simple, lower-cost vertical drilling and completions.

Targeting Basement Highs

The highest concentrations of helium are typically found near regional basement (Precambrian) highs, which are commonly found in the Deadwood formation.1

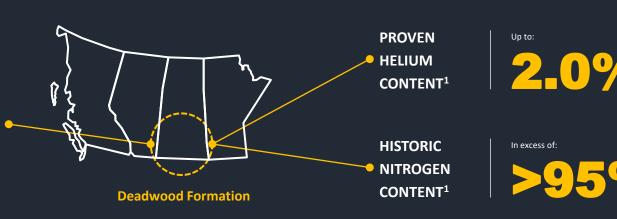

Nitrogen Carrier Gas

Saskatchewan helium occurs with nitrogen as the primary carrier gas with little associated CO2, allowing nitrogen to be vented in an environmentally-friendly manner, while providing cost advantages during helium extraction and purification.^{2,3}

The Deadwood formation has the highest concentrations of helium in Southwest Saskatchewan²

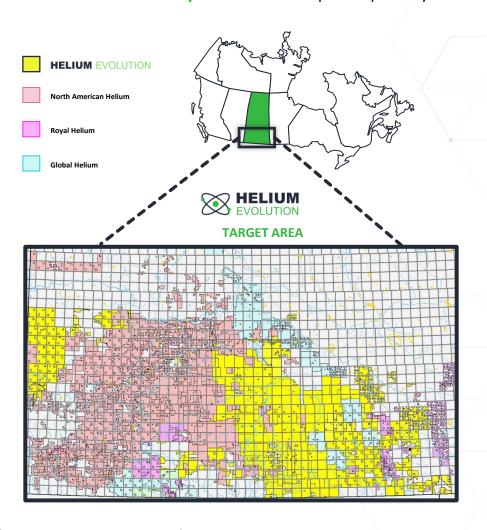

Radioactive decay of the **uranium** in southern Saskatchewan's basement rocks has produced significant helium reserves.²

HEVI Land Holdings

Bancroft Capital has outlined a detailed land and prospect analysis showing **significant upside potential.** This report is publicly available on HEVI's corporate website.

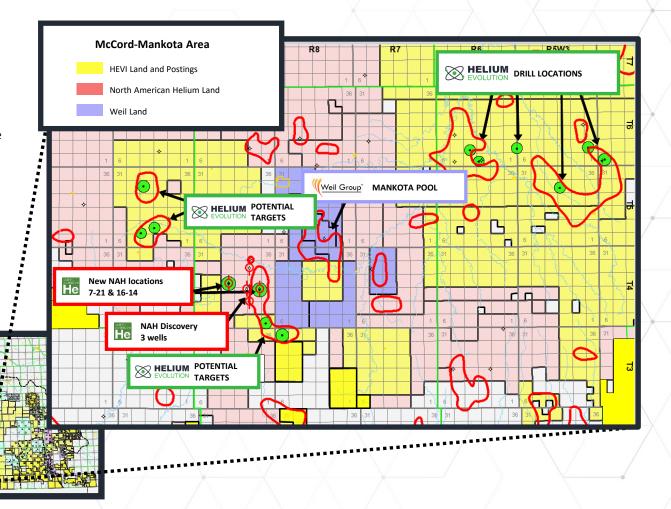

- HEVI holds 5.48 million acres of land permitted for helium, making HEVI the largest publicly-traded helium land holder in North America
- HEVI has ~200,000 acres of helium land currently under application
- HEVI land coverage offsetting what appears to be a significant helium discovery by North American Helium
- 180+ potential helium anomalies captured on current land holdings

Initial Drilling Focus Area

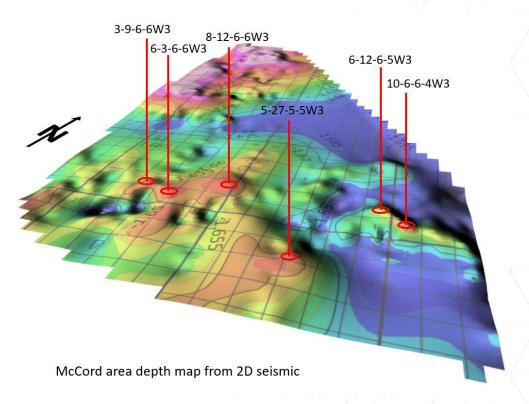

- Many basement high structures identified nearby proven helium discoveries
- North American Helium has drilled 5
 production wells on a discovery inside
 HEVI's initial focus area and licensed a
 6th well into their Mankota pool
- The nearby Mankota Pool has demonstrated a nitrogen-rich reserve with helium concentration of 1.08%¹

Multiple Defined Targets

HEVI's initial prospective drill locations are offsetting the helium discovery of peer company, North American Helium

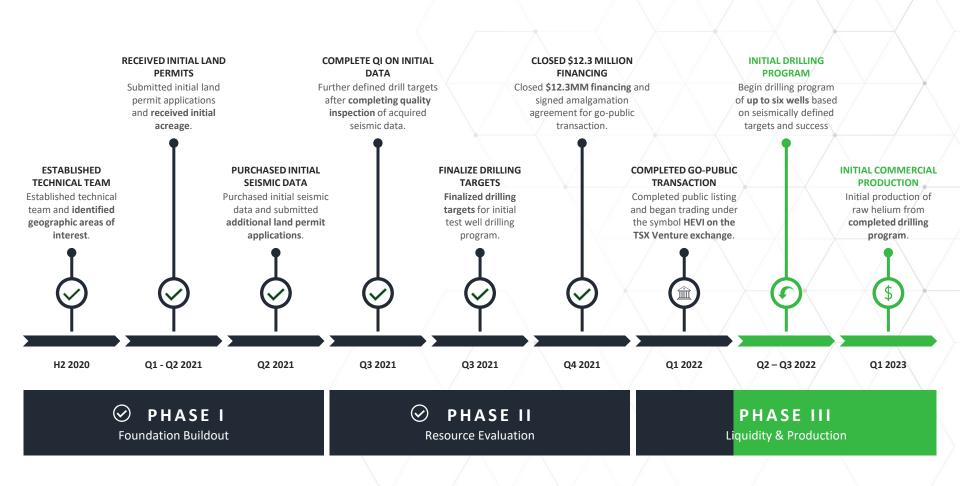

- At least 6 initial drill targets identified with seismic analysis to date
- Over 750 km of 2D seismic data purchased and shot to date
- Spudding of first exploration well expected in early June 2022 plus required casing secured
- Strategy for modular-based processing, production and offtake identified once production comes on stream
- Plans to establish a continuous cycle of shooting seismic, drilling and production
- Multiple years of drilling runway with structures captured on current land base

Growth Trajectory

Helium Evolution is executing on a strategically defined path to value creation.

Milestones

- Increased land holdings from 500k acres to 5.48MM acres
- North American Helium successful helium discovery on property adjacent to HEVI drill targets
- Over 750 km of 2D seismic data purchased and shot to date
- Initiated marketing and facility procurement discussions
- 6 initial drilling targets identified; expect an additional 10-12 targets to be identified in 2022 through further interpretation of new, recently acquired 2D seismic data

¹ Valuation calculated using \$0.30/subscription receipt price offered in recently closed subscription receipt financing ² Includes shares and dilutives held by management and board of directors

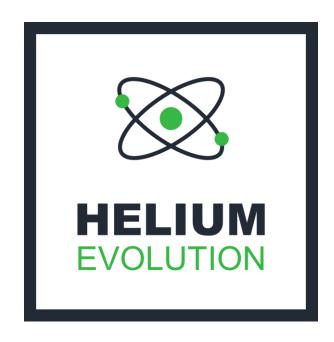

Helium Peers

With a strong fundamental value proposition, Helium Evolution holds a robust position relative to industry peers.
